WORK EXPERIENCE

General Assembly, New York, NY

March 2015 – June 2015

Web Development Immersive | Web Developer

- Studied and built web applications using Ruby and JavaScript languages using the latest technologies that adds value for the developer's future
- Demonstrated personal projects that enhance the developer ability to present in front of an audience in preparation for future employment
- Accomplished various of work assignments using different tools and technologies that provided hands on experience for the developer's skills and abilities

PERSONAL PROJECTS

Name That Tube (<https://namethattube.herokuapp.com>) - *A ruby on rails trivia game application designed for users to test their knowledge of music, games, TV, and movies by identifying specific YouTube videos as their clue for answers.*

- Created methods inside the controllers using PostgreSQL queries that controls the flow of the game
- Established a system that compares the selected answer against the correct answer using forms and Active Record queries
- Built HTML forms that renders content from the controllers and database designed for the player's experience which helps control the gameplay with the use of Embedded Ruby

Music Forum (<http://music-forum.herokuapp.com>)– *A simple Node/Express application where users can post music related topics and comments according to their personal interests.*

- Established a CRUD system within the application that allows the users to easily manage content
- Developed and created SQLite queries that syncs specific data into the views with the use of Mustache.js
