SUMMARY

I am a motivated and experienced candidate with a strong background in front-end web development. Dedication, independence, and being a team player are signs of my commitment to excellence. I enjoy developing game applications, listening to R&B Music, and watching online videos. Seeking an opportunity to work with multimedia with a well established company located in a metro area such as Atlanta, New York, or Charlotte, NC.

TECHNICAL SKILLS

Ruby (Sinatra, Rails), JavaScript (jQuery), PostgreSQL, SQLite3, HTML5/CSS3(HAML), Bootstrap, Photoshop, Pure, Picasa, Github, Heroku, TDD(RSpec, Capybara), API

WORK EXPERIENCE

General Assembly, New York, NY   **March 2015 – June 2015**
Web Development Immersive | Web Developer
- Studied and built web applications using Ruby and JavaScript languages using the latest technologies that adds value for the developer's future
- Demonstrated personal projects that enhance the developer ability to present in front of an audience in preparation for future employment
- Accomplished various of work assignments using different tools and technologies that provided hands on experience for the developer's skills and abilities

PERSONAL PROJECTS

Name That Tube (https://namethattube.herokuapp.com) - *A ruby on rails trivia game application designed for users to test their knowledge of music, games, TV, and movies by identifying specific YouTube videos as their clue for answers.*
- Created methods inside the controllers using PostgreSQL queries that controls the flow of the game
- Established a system that compares the selected answer against the correct answer using forms and Active Record queries
- Built HTML forms that renders content from the controllers and database designed for the player's experience which helps control the gameplay with the use of Embedded Ruby

Rails Blog (https://stokesblog.herokuapp.com)– *A simple ruby on rails blogging application that allows users to post content of their desires.*
- Established a CRUD system within the application that allows the users to easily manage content
- Created a dynamic layout which demonstrates easy navigation for the user's experience with the use of HTML5/CSS3
- Built and created partials that allows the developer to easily construct the web pages with forms with the use of Embedded Ruby

EDUCATION
